Experience

REENERGY, INC. MARENGO, OH

2016- PRESENT

A renewable energy company that uses the process of anaerobic digestion to turn organic waste into renewable biogas.

Environmental Compliance Specialist

- Managed all compliance obligations of the company with multiple governmental agencies and organizations including Ohio EPA, Ohio Department of Agriculture, and Public Utilities of Ohio
- Responsible for keeping accurate records across multiple operations in the company, renewing operating licenses and submitting permits for projects.
- Analyzed data based on performance of the systems and compare against regulatory requirements.
- Utilized risk assessments to identify the company's greatest environmental risks and executed projects to reduce these risks from occurring.
- Lead facility investigations with regulatory representatives. Available to answer all questions about facility performance and all regulations were being followed.
- Oversaw ISO 9001 and 14001 implementation and compliance to improve operational efficiency and standardize business processes across the company. Closely monitor progress against stated objectives in the ISO framework.
- Train and updated staff on new processes required by updates to the compliance program.
- Directed the entire intern program from hiring to project completion.
- Supervised projects related to engineering tasks. Successful completion of projects created value to our fertilizer byproduct operations and led to understanding customer needs through marketing and surveys.
- Reduced Notices of Violations from an average of three a year to zero through developing proper processes and executing on corrective actions.
- Worked with senior management to plan projects and secure financing through various government initiatives. Prioritized projects based on their return on investment.
- Assisted with fertilizer sales and all agronomy needs of the company. Tasks include contacting local farmers to ensure all necessary information was captured during land application. Responsible for the completion of the billing process.
- Worked as a plant operator, coordinating day-to-day operations. Worked with other employees to ensure material was processed in a timely manner.

CAMPUS GRINDS, COLUMBUS, OH

2014- 2016

An Ohio State University campus dining location, specializing in café/grab and go cuisine

Student Manager

Trained and supervised employees and improved efficiencies of a high-volume dining facility

- Managed inventory and executed opening and closing procedures.
-
